

SANDRA OGBUDINKPA

 [LinkedIn](#) |  862-704-9706 |  Charlotte, NC |  sandra.os325@gmail.com

■ PROFILE

Dedicated Computer Engineer with over 4 years of experience in software development, specializing in Python, Flask, and Django. Adept at full-stack development and system architecture, with a proven track record in building scalable applications and optimizing software performance. Recognized for exceptional problem-solving skills, teamwork within agile environments, and a commitment to continuous learning in tech.

■ EXPERIENCE

iQor

Charlotte, North Carolina

Technical Support Representative

July 2023 - January 2024

- Continuously achieve a resolution rate of over 95% for intricate hardware issues on the first call, consistently exceeding company KPIs and enhancing customer satisfaction.
- Consistently provide clear, concise guidance on a diverse range of products/services, maintaining an exceptional 99.5% positive feedback rate.
- Apply effective problem-solving methodologies to promptly address complex issues, contributing to an ongoing 25% reduction in escalations.

Saidatech LLC

New York, New York

Software Developer

August 2020 - Present

- Engineered and maintained scalable back-end systems using Python, Flask, and Django, resulting in a 25% increase in system efficiency and a decrease in server downtimes by 15%.
- Integrated SQL databases with Python for optimized data handling, serving over 130,000 users..
- Developed microservices-based features and collaborated with the AI team to integrate AI-driven functionalities into the e-learning platform, improving personalized content delivery by 35%.
- Collaborated with a cross-functional team to transition from monolithic architectures to serverless functions, optimizing deployments with Docker, Kubernetes, and OpenShift.
- Collaborated with the front-end team to develop and implement user interfaces using React, enhancing platform user experience ratings by 9%.
- Implemented rigorous testing protocols, using Git and GitHub for version control, continuous integration, and collaboration, reducing code integration issues.
- Enhanced the platform's data science capabilities by incorporating Python-based data analytics, aiding in real-time course performance analytics.

RadicalX

New York, New York

Software Engineer Intern

April 2020 - August 2020

- Played an integral role within an Agile team, designing, coding in C++, and validating new software features, increasing software performance by 20%.
- Contributed to front-end web development, incorporating advanced HTML, CSS, and JavaScript practices to elevate user experience.

Engineering, UNC Charlotte

Charlotte, North Carolina

CAD Engineer Intern

May 2019 - April 2020

- Mastered AutoCAD and Eagle software, delivering intricate PCB designs 15% faster than department average.
- Employed innovative solutions to meet stringent budget constraints without compromising design quality.

University of North Carolina at Charlotte

Charlotte, North Carolina

IT Customer Service Desk Assistant

February 2022 - February 2023

- Streamlined and maintained digital information organization, enhancing accessibility for campus residents and staff, thereby driving operational efficiency
- Mentored new hires, laying a robust foundation for their technical roles and elevating the team's overall productivity.
- Implemented innovative strategies to manage resources and data, significantly improving process efficiency and user satisfaction within the residence community.

University of North Carolina at Charlotte

Charlotte, North Carolina

Resident Advisor

October 2018 - December 2021

- Facilitated the introduction of over 500 students to extracurricular groups, enhancing campus involvement
- Swiftly addressed resident needs, facility concerns, and emergencies, ensuring 100% resident satisfaction

▪ **EDUCATION**

Bachelor of Science in Computer Engineering, Minors in Electrical Engineering and Mathematics

University of North Carolina at Charlotte ▪ Charlotte, NC

Relevant Coursework: Computer Organization, Digital Signal Processing, VLSI Systems Design, Signals and Systems, Systems and Electronics Lab, Logic and Networks Lab, Embedded Systems, Data Communication and Networking, Data Structures and Algorithms, Electronics and Semiconductors

▪ **PROJECTS**

Real-time Product Marking, Senior Design - Pallet Tower

August 2021 - May 2022

- In charge of developing a program using click software that takes in a user specification and signals a sensor to measure the length and speed of a corner board to be marked, it then signals a printer on how to mark.

Universal Asynchronous Receiver-transmitter Design

February 2021 - May 2021

- Designed a Baud rate generator and receiving subsystem and wrote a testbench to verify the output pulse within the system.
- Implemented a transmitter to send and receive the contents of a system's memory to achieve communication with multiple ChromeOS laptops that are 800 meters apart.

32-bit Processor Project, Computer Organization

August 2019 - December 2019

Project Lead

- Took charge of creating the VHDL code for the whole design and a testbench code that simulated the implemented design.
- Successfully developed a 32-bit processor using VHDL as part of a three-person team, as well as the datapath for a given instruction set with a control unit using single cycle and pipelining implementations.

▪ **SKILLS**

Programming & Development: Proficient in Python, C/C++, JavaScript, VHDL, HTML, and CSS

Web Development: Experienced in full stack development using Django, Flask, React, Node.js, and Express

Cloud & DevOps: Skilled in Full Stack Cloud Development, Containers with Docker, Kubernetes, OpenShift, and serverless computing

Data Management: Expertise in SQL databases, Python for Data Science, and AI application development.

Version Control: Proficient in using Git and GitHub for collaborative development and continuous integration.

Frameworks & Platforms: Deep Learning with PyTorch, AWS, AI-driven application development.

Tools: AutoCAD, SolidWorks, Eagle, P-Spice, MultiSim, PCB.

Networking: Adept in network setup, maintenance, TCP/IP, VLAN.

Systems: Windows, Linux, MacOS.

Soft Skills: Excellent problem-solving, critical thinking, teamwork, effective communication.

Others: English proficiency, Microsoft Office Suite, LATEX.

▪ CERTIFICATES

- Python Programming Certificate
- Data Science with Python

▪ SOCIETIES AND PROFESSIONAL DEVELOPMENT

- | | |
|--|--------------------------------|
| ▪ IEEE Robotics and Automation Society Member | <i>February 2019 - Present</i> |
| ▪ HTML5 Project Management Needs vs. Expectations; <i>Skillsoft</i> | <i>October 2020 - Present</i> |
| ▪ Women in Leadership: Building Your Infrastructure for Leadership; <i>Skillsoft</i> | <i>October 2020 - Present</i> |

▪ ACTIVITIES

- | | |
|--|------------------------------------|
| ▪ <u><i>Helping Hand Project</i></u> , UNC Charlotte Chapter | <i>September 2018 - Present</i> |
| ▪ <i>Volunteer Notetaker</i> , Office of Disability Services | <i>August 2019 - December 2019</i> |
